

ART BASIN INSTALLATION MANUAL

Recommended tools and materials

1.

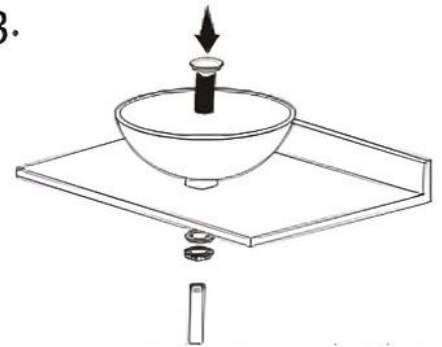

Set the basin over the installation surface, cut the hole according to the wastepipe.

2.

Set the basin on installation position, ensure the properly alignment between basin and installation surface.

3.

Ensure basin against the surface installing the wastepipe. Tighten all pieces and ensure to put them on the correct position. Do not overtighten as it could crack the product.

4.

Finish to fit and connect the supply and the wastepipe accordingly.

5.

For ceramic basins, put a caulk bead where the basin its supported, Glass basins do not need this caulk bead.

CARE AND MAINTENANCE INSTRUCTIONS

Your new basin provides you with years of good service. Cleaning should be done in a regular basis. Use of scouring cleaners may remove the glaze on the basin and are not recommended. Wipe all outer surfaces with a soapy water solution and clean basin area with non-abrasive type cleaners. Use of cleaners containing chlorine will cause damage and are not recommended.
